

OEE Alert Tool Tip

Maximize views on a big screen TV

Deb-Tech Systems, Inc.
Debbie.Olk@DebTechSystems.com
800.875.3181 x.2

Challenge ~

When displaying the OEE Alert views on a big screen TV, you want to get all of the data to display on the page.

OEE Alert is browser-based. This means that the information on one tab can be inherited by other tabs in the same browser session.

For example, you may be displaying the Production State View for lines in Group 1 on one tab and you want to have another tab display the Production State View for lines in Group 2.

To make this happen, you have to explicitly tell the browser what you want displayed in each tab.

Solution ~

OEE Alert provides the ability to display the views in Kiosk and TV Mode.

- “Kiosk” Mode
 - Provides the ability to have multiple tabs displaying different categories or groups.
- “TV” Mode
 - Set the displays for “TV” Mode by removing headings, footers, menu options, etc.

The image shows three separate browser windows, each displaying a production state dashboard in "TV" mode. The top window is for 'Die Cutters' (Category: Die%20Cutters), the middle for 'Printers' (Category: Printers), and the bottom for another category (Category: Area:Printers). Each window has a red circle highlighting the URL bar, showing the specific category filter applied. The dashboards themselves are identical, featuring a large digital sign with real-time production data (e.g., 1133, 0.835, Target, Actual, Efficiency, Down) and a detailed shift schedule table at the bottom. The tables show data for shifts from Friday, Jan 01, 2021, to Thursday, Jan 07, 2021, across various shifts (First, Second, Third) and days.

Shift	Day	Start Time	End Time	Actual	Target	Efficiency	Notes
First Shift	Fri	08:00:00 AM	12:00:00 PM	1133	1133	100%	
Second Shift	Fri	12:00:00 PM	04:00:00 PM	0.835	0.835	100%	
Third Shift	Fri	04:00:00 PM	08:00:00 PM	0.835	0.835	100%	
First Shift	Sat	08:00:00 AM	12:00:00 PM	0.835	0.835	100%	
Second Shift	Sat	12:00:00 PM	04:00:00 PM	0.835	0.835	100%	
Third Shift	Sat	04:00:00 PM	08:00:00 PM	0.835	0.835	100%	
First Shift	Sun	08:00:00 AM	12:00:00 PM	0.835	0.835	100%	
Second Shift	Sun	12:00:00 PM	04:00:00 PM	0.835	0.835	100%	
Third Shift	Sun	04:00:00 PM	08:00:00 PM	0.835	0.835	100%	
First Shift	Mon	08:00:00 AM	12:00:00 PM	0.835	0.835	100%	
Second Shift	Mon	12:00:00 PM	04:00:00 PM	0.835	0.835	100%	
Third Shift	Mon	04:00:00 PM	08:00:00 PM	0.835	0.835	100%	
First Shift	Tue	08:00:00 AM	12:00:00 PM	0.835	0.835	100%	
Second Shift	Tue	12:00:00 PM	04:00:00 PM	0.835	0.835	100%	
Third Shift	Tue	04:00:00 PM	08:00:00 PM	0.835	0.835	100%	
First Shift	Wed	08:00:00 AM	12:00:00 PM	0.835	0.835	100%	
Second Shift	Wed	12:00:00 PM	04:00:00 PM	0.835	0.835	100%	
Third Shift	Wed	04:00:00 PM	08:00:00 PM	0.835	0.835	100%	
First Shift	Thu	08:00:00 AM	12:00:00 PM	0.835	0.835	100%	
Second Shift	Thu	12:00:00 PM	04:00:00 PM	0.835	0.835	100%	
Third Shift	Thu	04:00:00 PM	08:00:00 PM	0.835	0.835	100%	

Kiosk "Mode"

Display same view on different tabs for different categories or groups

Use Case – reason for this capability

- To be able to display groups of devices on a different tab and to be able to cycle through the tabs without changing the groups. **Useful on a big screen TV.**
- You may have your devices grouped by **Filters – Category** to see how the categories are setup. You will need to know exactly how they are setup as this is how you will configure the page.

To make a browser tab always display the same category or group:

After you have selected the View, such as Production State or Hour-by-Hour, you would make the following changes to the browser address:

Enter exactly as follows for each type of Filter:

```
?deviceCriteria=category:Area:Die Cutters  
?deviceCriteria=category:Plant:Assembly  
?deviceCriteria=group:Scheduling  
?deviceCriteria=group:myGroup[debbie] (personal groups)  
?deviceCriteria=query:Main Building  
?deviceCriteria=device:Sheeter 1
```

Select criteria for assets

Categories	Groups	Queries	Devices
Area			
<input checked="" type="radio"/> Die Cutters			
<input type="radio"/> Folder/Others			
<input type="radio"/> Printers			
<input type="radio"/> Sheeters			

To make a browser tab always display the same part of the day:

After you have selected the View, such as Hour-by-Hour or Day at a glance, you would make the following changes to the browser address:

Enter exactly as follows for each type of Filter:

?selectedDate=Today

?selectedDate=Last24h

?selectedDate=Last12h (or Last8h, Last4h, Shift, or Shift1, similar to the selectedDate dialog

To make a browser tab always display the same date range:

After you have selected the View, such as Production State Top Losses, you would make the following changes to the browser address:

Enter exactly as follows for each type of Filter:

?daterange=Today

?daterange=YD (Yesterday)

?daterange=WTD (Week-to-date)

?datetange=LW (Last Week)

Other options are: MTD, LM, QTD, LQ, YTD, LY for Month, Quarter and Year, respectively

“TV” Mode

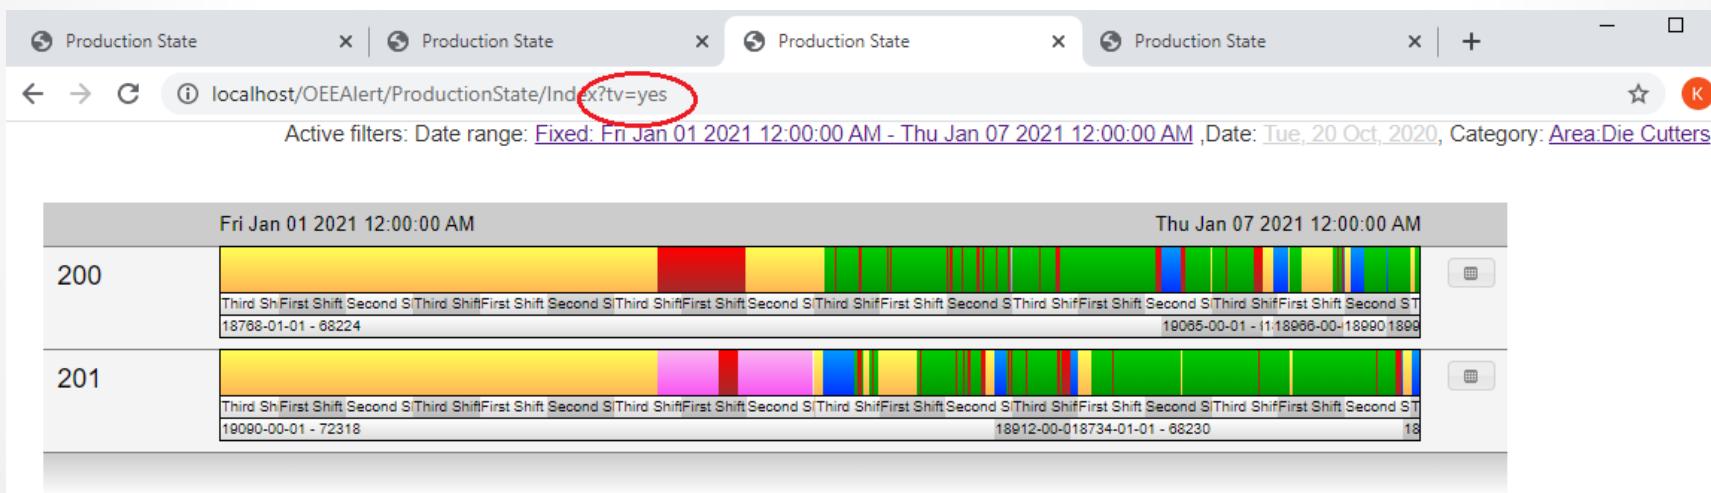

Remove top banner, menu, options or all to display on TV.

After you have selected the View, such as Production State or Hour-by-Hour, you would make the following changes to the browser address:

Enter exactly as follows for each type of Filter:

- ?nobanner=yes : no banner/nav (menu)
 - ?nomenu=yes: no nav (menu)
 - ?nooptions=yes: no options
 - ?tv=yes: no banner / nav / options / licensedTo, poweredBy

The URL would look like this -> <http://yourserver/OEEAlert/ProductionState/index?tv=yes>

This feature can be combined with the “Kiosk” Mode by separating the commands with ‘&’.

Contact Us

- We extend the capabilities of your Vorne XL devices through Data Collection, Visualization, Integration and Reporting.
- We provide sales, and support for OEE Alert. (www.OEEAlert.com)
- We provide support for the **OEEStudio** reporting software (designed specifically for the data captured from the Vorne XLv1 devices).
